

## **Help for Perinatal Families**

Receiving a perinatal diagnosis that their child has a life limiting condition and may die during the pregnancy or shortly after birth is devastating to the family. Hospice can support family caregivers by reducing stress and providing counseling and spiritual support.

### **Services Provided:**

- Psychosocial and spiritual support
- Collaboration with the perinatologist and obstetrician
- Assisting with the birthing plan and final arrangements
- Bereavement during and after the birth
- Evaluation to the pediatric program for home care after discharge from the hospital

All patients are eligible regardless of the diagnosis or insurance

For referrals, send to our agency using this form on the following page.

**Pediatric Program of The Elizabeth Hospice**

**If you have a family whom you would like us to evaluate, complete  
and**

**FAX this form to 760.796.3781.**
